RG59 MINI QUICK STEPS

STEP 01

Calibrate Cable

Once the cable is prepared, connect VoD unit then press and hold the ON/OFF button for 8 seconds. This process will take around 5 mins.

STEP 02

Check Settings

Once calibrated, make sure the unit reads approximately 305m.

Cable Installation

Disconnect the VoD unit, and replace the connector in the center of the cable roll, otherwise as you pull cable the end with the BNC connector will spin and break.
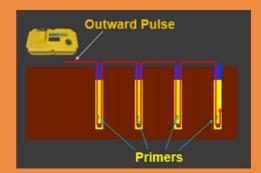

STEP 03

Cable Installation First hole

The end of the cable must be looped at least 3 meters, then lowered down the first fired hole.

STEP 04

Cable Installation following holes

For the following holes, the cable must be looped down and back up the hole, record the meter markers in and out of the holes, leaving slack in-between holes.

STEP 05

Connect and Set

Before the blast, connect VoD unit, turn on device, make sure it reads approximately 305m. The unit will arm itself after a few minutes.

STEP 06
